

**Software Developer
Nebraska School Activities Association**

The Nebraska School Activities Association located in Lincoln, Nebraska, is seeking candidates for the position of Software Developer to assume duties on or about March 1, 2019.

The software developer will be responsible for all operations of the association's website and administrative portal (AWS), including overall development and security of the front end (WordPress) and back end (PHP/MySQL) systems, updating current online applications, in addition to developing and implementing a usability testing process, among other duties. The Software Developer will work directly with eight NSAA Directors and five support staff members.

Minimum requirements will include a bachelor's degree in computer science or a related field or equivalent training; at least two years of successful experience in software development; and experience working in a group setting. The right candidate will have excellent communication skills, with the ability to translate user requests and bylaw changes into system updates and additions. A background with high school activities/athletics is welcomed.

The salary for this position is competitive and commensurate with the qualified candidate's experience and training. A competitive benefits package will be provided, including health insurance, 403(b) matching retirement plan, life insurance and paid vacation and sick leave.

Application materials must be completed and returned by January 17, 2019. Applications may be emailed to jbellar@nsaahome.org, or mailed to:
