2019 INFORMATION FOR STATE CROSS COUNTRY COACHES

1. **UNIFORM:** Coaches are reminded to be sure their team is in compliance with the uniform rule before they report to the starting line.
   a. **4.1.2 PENALTY:** (Articles 1, 2) For the wearing of an illegal uniform, when a violation is observed and noted by a meet official, the competitor shall be required to make the uniform legal before becoming eligible for further competition, and shall be issued a warning that a subsequent violation shall result in a disqualification from the event. The referee shall be notified of the violation by the observing meet official, and the referee shall then notify or cause to be notified the head coach of the offending school of the competitor’s violation and warning.

2. The wearing of decorative headwear while competing is prohibited. Headbands with the permissible manufacturer’s logo and/or school name are permitted. Rubber bands, scrunchies, ribbons, and elastic bands are not considered jewelry and may be used in the hair. A single solid color knit stocking hat may be worn in frigid weather.
   a. **8.3.3 PENALTY:** A competitor not wearing the assigned contestant number and/or computerized transponders/chips or altering such items in a manner which interferes with the recording of place finish is a rule violation resulting in disqualification from the race.

3. **CHIPS:** The NSAA State Cross Country Championships will use bib chips that are affixed to the back of the bib that your athlete has been assigned.
   **NFHS Rule 8-3-4:** Computerized transponders/chips may be used to record the finish order of a runner in cross country. A bib transponder or two transponders/chips per runner, one attached to each shoe, is preferred. When transponders/chips are used, the official order of finish for the runners is that recorded by the transponder/chips, unless meet management is also using an image-based timing system that indicates the order should be adjusted.
   a. It is recommended an image-based timing system, officially designated by the meet director, be used to verify the order of finish in all cases proactively when desired by meet management and/or if there is a challenge to the finish order.
   b. If the finish order determined by the transponder/chip is reversed using an image-based timing system, the times shall also reflect the change.

4. **Wearable Technologies:** The availability of wearable technologies that allow individuals to monitor a variety of body functions, including but not limited to, heart rate, blood pressure, pace and distance traveled are readily available and cost effective. Nearly all these wearable technologies can both transmit and receive collected data from other mechanisms. This data can be used to evaluate how the body is performing, and the user can adjust as needed based on that data.

   This type of technology is being incorporated into watches, garments, shoes and jewelry and, in most cases, is nearly impossible to distinguish from the same item type that does not include the technology (e.g., Apple watch vs. traditional watch).

   **NFHS Track and Field and Cross Country Rules do not prohibit the use of wearable technologies, but Rules 3-2-8a and 4-6-5d state that no competitor may receive electronically transmitted data from a coach or other third party. If such communication is observed by an official, the competitor should be disqualified.**
While preventative officiating helps to avoid issues in any event, it is obvious that those trying to police wearable technologies by restricting what can be worn by competitors is asking event officials to perform an impossible task. Restricting the wearing of a watch because it contains GPS capability is futile when the same technology is available in the shoe, the sports bra they have on or the ring they are wearing.

The market for wearable technology is forecasted by most sales and marketing experts to continue to grow – some estimate that nearly 500 million wearables will be sold by 2021. This massive expansion creates the potential for more coaches and athletes to be "connected" through some type of wearable technology. It is important that all involved (administrators, coaches, parents, student-athletes) understand the privacy and legal issues surrounding the sharing of personal biometric information. Discussions and steps should be taken to ensure that compliance with any Federal and State policies or laws are addressed appropriately.

5. **ATOMIZER** The use of the atomizer must be prescribed by a physician. A letter or note from the doctor must be presented to the meet director/referee documenting the need of the athlete to use the atomizer during competition to ensure his or her safety. Without a doctor’s statement, the athlete may only use the Inhaler prior to and after competition.
